User manual
for
OpenMRS Android Client

Combining health with technology

So first you should open the application by clicking on the OpenMRS Android Client. After opening you will see a screen link this-

The screenshot displays the OpenMRS Android Client login interface. At the top, the status bar shows the time 7:07 and various system icons. The main content area features the OpenMRS logo, which consists of a white circle with four colored segments (orange, blue, green, yellow) around it, followed by the text 'OpenMRS'. Below the logo is a form with the following elements:

- A red-outlined text input field labeled 'URL address'.
- A text input field labeled 'Username *'.
- A text input field labeled 'Password *' with an eye icon for toggling visibility.
- A red asterisk followed by the text '* Required'.
- The text 'Online' with a cloud icon.
- A green button labeled 'LOGIN'.
- A green link labeled 'Unable to login?'.

The bottom of the screen shows the standard Android navigation bar with back, home, and recent apps icons.

Then you need to enter the URL address, Username, Password. If you don't them then use demo server with the details in the image.

LOGIN

[Unable to login?](#)

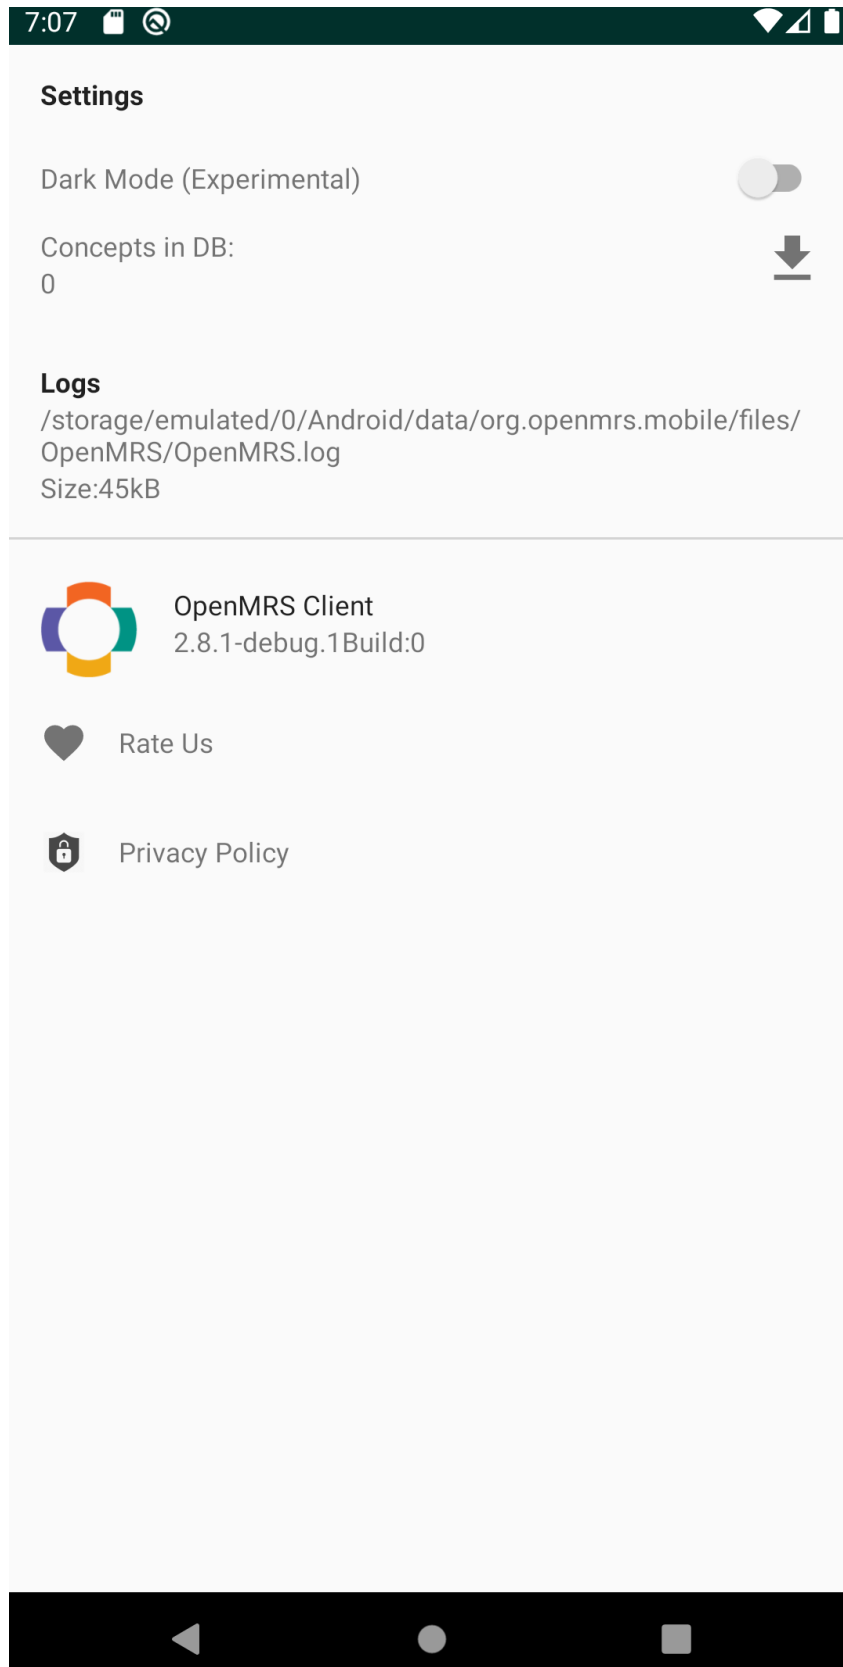

Then you will be able to see system dashboard

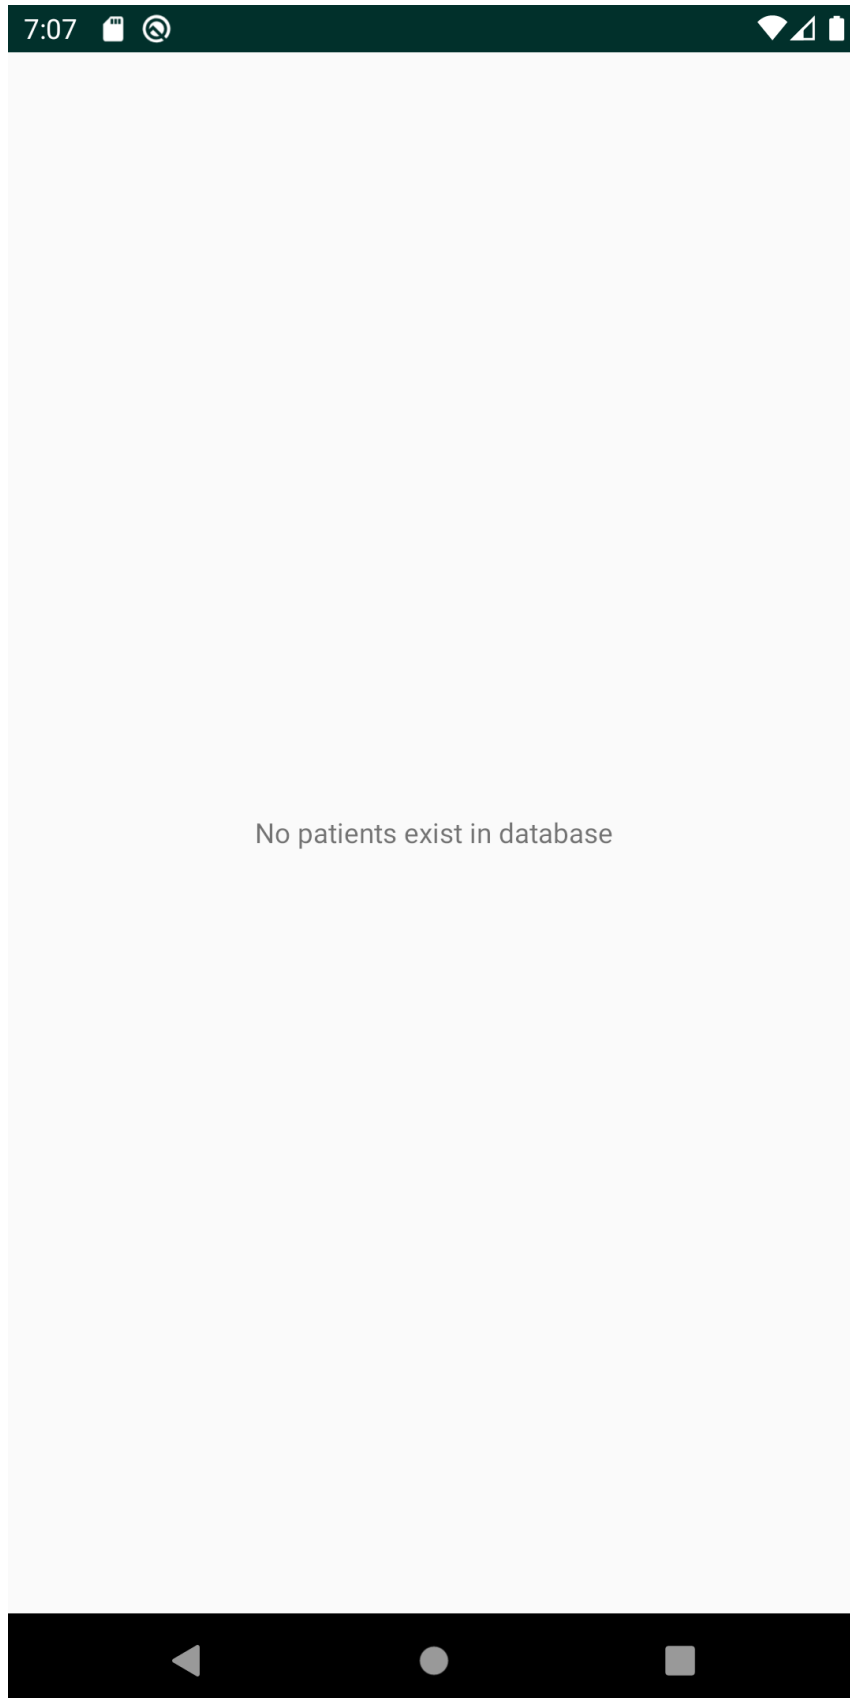

When you click on the dot bar above you will have options to go to settings or logout.

After clicking on settings you should see this type of data.

After clicking on the find patient option you will see a screen saying no patient exist in the database that means you first need to register a patient and then you will see it here

Then on clicking on Register a patient you will get a screen in which you need to fill patient details and then click submit. It is saying there are no concepts in DB because we have no patient registered. After registering patients you can also plan appointments which you will see in active visits and capture vitals etc. in form entry.
